Summary

I am a 24-year-old computer IT graduate with a focus on website design and internet connectivity. To date I have developed several programs allowing networked connections in the field of gaming and financial banking. My goal is to continue developing these skills by leveraging my knowledge base in creating solutions that support pharmaceutical industries and beyond.

EDUCATION

Bachelor of Science -Information Sciences and Technology- GPA 3.37 (in major)

The Pennsylvania State University-Penn State - Scranton, Harrisburg - September 2019 - December 2025

Work History

Net Credit Union, Scranton PA - Intern, Website Design and internet connectivity

May 2025 - August 2025

- Created a centralized website named *Cordon* for managing banking internal links and programs where employees could access individual links all in one place accelerating efficiency.
 - Creation utilized Microsoft SQL Server, ASP.NET and Microsoft IIS for intranet website hosting for the bank.
 - Created a database and administration system for managing internal link collection and curation
 - Programmed user verification and access utilizing Kerberos for Secure Sign On authorization via Windows Active Directory.
 - Presented *Cordon* to the bank at the end of the internship date, which the bank had already adopted for use.

Private Projects

Lead Programmer for Knockout, Remote—game app.

March 2017- September 2020

- Co-Founded the game creating the initial combat and character templates as the primary programmer of the project -starting in Junior Year of High School.
- Later consulted by peers where I assisted with the integration of character move sets after leaving the project. Project received **118k views** on its first trailer on YouTube since its inception 6 years ago, with subsequent trailers reaching **40k views**. The link is here [KNOCKOUT! - Reveal & Demo Launch Trailer](#)

Project Director -SCP: Cross Containment game app, Remote—

October 2019 - January 2023

- Personally directed, programmed and animated this game as the primary combat designer.
- Hired other programmers, artists, voice actors and sound designers achieving a game that amassed **20k views** across trailers on YouTube. The link to the game is here:
